

SUMMER SHOWCASE 2026

28–29 APRIL 2026

STUDENT GUIDE V1

Where will you spend Summer 2026?
A curated guide to programmes across India for
high school students.

Copyright © 2026 College Access Program,
Boost India Private Limited

FOREWORD

Young learners today are asked to make high-stakes decisions early regarding disciplines, universities, and careers, often before they have had the chance to experience any of it first hand. Academic excellence alone does not answer those questions. Exposure does.

That is what summer programmes offer. Not just a way to spend a break, but a chance to test interests against reality, to discover what holds attention and what does not, and to return to the school year with sharper questions than the ones you started with.

At the College Access Program, we have watched this happen over the years. A student who spends two weeks inside a research lab, a design studio, or a policy classroom comes back changed. Not always certain of their path, but clearer about how to think about it. That clarity is what we want every student to have.

This guide brings together a selection of India's most thoughtful summer programmes and the institutions running them. It is a companion to the online summer sessions you may have attended, and a starting point for the conversations that should follow at home and with your counsellor. Use it to explore possibilities you had not considered. Use it to ask better questions about what comes next.

We hope this, along with other College Access Program resources, helps you approach your future with intention.

Good Luck!

Ambikaa Ma'am

College Access Program

NOMINATE A STUDENT

We invite schools to nominate 2 student ambassadors from Class 11 or 12 to represent your school as part of the CAP Ambassador program. These are students who care—not just about their own college journey, but about making sure their peers feel seen, supported, and informed. They'll work alongside your school counselor and the CAP team to bring clarity, energy, and heart to the college guidance process.

A CAP Ambassador is someone who shows initiative, cares about helping others, and brings a sense of leadership, reliability, and curiosity. Ambassadors will commit around 15–20 hours per academic year, including joining monthly updates with the CAP team, gathering student questions and session requests, supporting counselors during university fairs or outreach events, and helping build awareness around college-related opportunities.

By nominating a CAP Ambassador, you're giving a motivated student a platform to lead, grow, and make a real difference. And for your school, it means stronger peer engagement, better student feedback loops, and a deeper connection to CAP. All nominated ambassadors will receive a certificate of contribution at the end of the year.
